Please reject NAB petition 04-160. I have a minimum 40 minute commute in the Washington, DC area. If I get stuck in a traffic jam, that can increase to two hours or more. Commercial radio traffic reports rarely mention the traffic problems on the roads I use. With XM radio, I get comprehensive, timely reports that allow me to change my route to avoid these problems. Commercial radio does a poor job of covering all the problem traffic areas. Don't take this choice away from us.
